### **Our lifestyles should not harm present or future generations SOL projects for fair and sustainable lifestyles**

SOL is concerned with promoting positive and globally-minded lifestyles, which take into consideration the consequences for future sustainability generations and humans in other parts of the world at the same time. This requires us to reflect over our needs and consumption habits and intensively engage in fair production and trade. Therefore SOL works on projects and campaigns that deal with a wide variety of ecological, educational and economic topics.

„Appeal for a delightful, solidary and ecological lifestyle“, see also [www.nachhaltig.at/aufwurf/](http://www.nachhaltig.at/aufwurf/)

Project „Futuro“ calculates „sustainable prices“ for products, see also [www.futuro-preise.at](http://www.futuro-preise.at)

### **Lifestyle-25: Partners for sustainable lifestyles in Europe!**

SOL was founded 25 years ago and has around 1500 members all over Austria. The organisation is politically independent and interdenominational.

Recently the EU-15 grew to EU-25. This gives us the reason to spread our activities (even beyond the borders of the EU-25) by cooperating with NGOs in Central- and Eastern Europe.
